

Connecting ipad/iphone to PC without any cables (see notes at end for MAC)

Depending on your OS the screens may look a little different.

Before you do this, make sure you have the zoom app downloaded to your ipad/iphone and you are logged into that ZOOM app. Also, make sure your privacy settings allow access to zoom.

1. Once in ZOOM meeting go to share and select iPhone/iPad and click share (the dark blue background) (Fig 1)

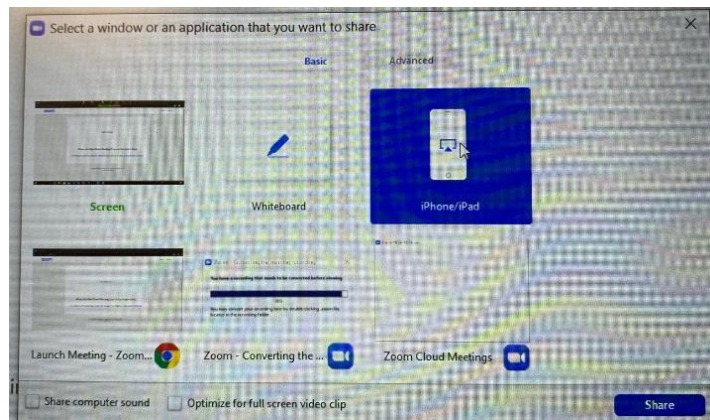

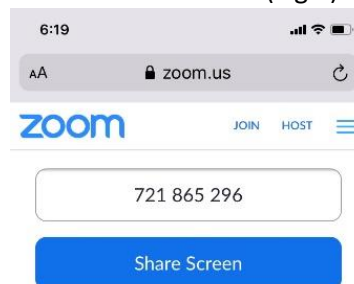

Fig. 1

2. On ipad/iphone go to your internet browser and type:
Zoom.us/share
3. Enter meeting number. Then Click "SHARE SCREEN" (Fig 2).

Enter a Sharing Key to present

Fig 2.

4. If it asks “Open this page in ZOOM?” click “OPEN” (Fig 3).

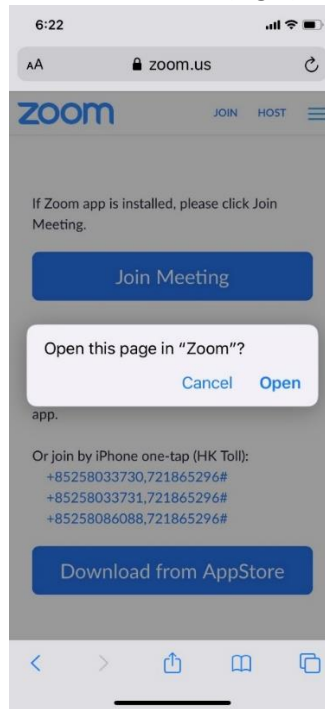

Fig 3.

5. Click “CONTINUE” (Fig 4)

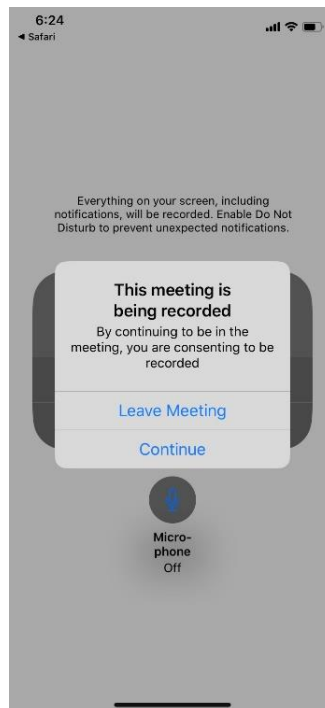

Fig 4.

6. Select ZOOM and then click “start broadcast” (Fig 5). You may get a message saying it will stop others. Once done, you can select anything on your iphone/ipad. You are all set. ENJOY!

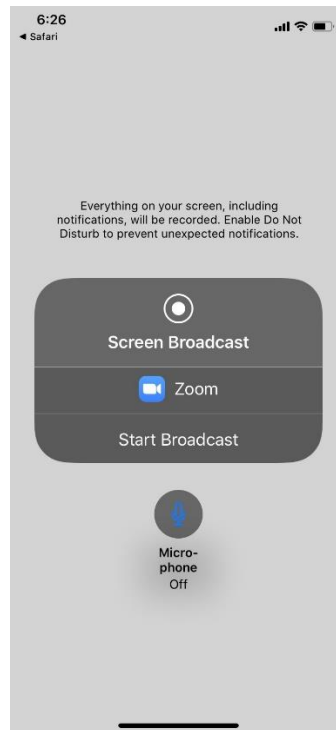

Fig 5.

Additional Notes:

- 1. If you stop the ipad/iphone broadcast you will need to redo a few of the above steps.**
- 2. You can use a similar procedure to connect an ipad/iphone to a MAC without a cable. For that use Airplay in ipad/iphone**
